

Skill Set: Hazardous Materials Recognition, Identification, Notification

Reference: NFPA 470, 2022 Edition - Chapter 5, Section 5.2.1(B) - Recognition and Identification; 5.3.1(B) - Initiate Protective Actions; 5.4.1(B) - Notification

Candidate Equipment Required: ERG

Evaluator Equipment Required: HazMat Incident Worksheet

Evaluator’s Instructions to the Candidate

At this station, you will be provided with an image of a HazMat Incident Worksheet. Each worksheet has a different HazMat Incident scenario.

After reading the scenario, complete **ALL** portions of the HazMat Incident Worksheet as if you are the first responder arriving on the scene and temporarily in command until an officer of a higher rank arrives and relieves you.

Some of the items to consider include - but are NOT limited to - level of PPE & respiratory protection required, chemical name, ID#, container type, and method(s) of controlling the product, etc.

Once complete, I will act as the incoming officer and you will communicate to me all necessary information about the incident following policies and procedures.

Candidate MUST successfully be competent in each step listed to pass this skill station.

No.	Evaluated Skill Items	First Time		Retest	
		Pass	Fail	Pass	Fail
1.	Collected and determined hazard information using approved reference sources.				
2.	Described potential hazards, harm, and outcomes based on potential behavior.				
3.	Used approved reference sources to identify: - Hazardous material(s) by name - Emergency response information (required PPE, evacuation distances) - Potential fire, explosion, and health hazards				
4.	Communicated all necessary information about the incident following policies and procedures.
