The Woodbury County Fire Association in cooperation with Western Iowa Tech Community College presents

The 32nd Annual Northwest Iowa Regional Fire School

March 14 - 15, 2020

Western Iowa Tech Community College
www.the-security-institute.org
32nd Annual Northwest Iowa Regional Fire School

The school will be held the weekend of March 14 and 15, 2020 on the Western Iowa Tech Community College campus, 4647 Stone Avenue, Sioux City, Iowa.

OUR OBJECTIVE is to provide quality fire training at a reasonable cost. To insure quality, the school features instructors widely recognized for expertise in their area of instruction. Each class has a size limit, so register early.

Saturday Morning - 3 Hour

Building Resiliency in the Fire Service
During this three hour class offered each day, members of the SCFR Peer Support Team will speak on the stressors that are inherent to the job. How this stress can manifest into a variety of issue, and what can be done to combat it. Removing the stigma and helping people identify the signs of Post Traumatic Stress.

Instructors: Lt. Wynn, MFF Hendrickson, Sioux City Fire Rescue

Cutting Edge Drone Technology for Public Safety
Drones are becoming a must have for emergency management. We will be discussing the current FAA rules and regulations for drone operations and required training. We will discuss how drone technology is evolving to solve problems that early adapters has encountered. Flight demonstrations will follow the presentation with a number of systems being shown including thermal and high zoom cameras. Weather permitting, shots with the FLIR thermal camera during some of the outdoor training exercises will be conducted. Class limit 30.

Instructors: Tom Simmons and Mike Klarenbeek from Aerial Horizons

Stop the Bleed
This three hour class repeated both days, teaches civilians and first responders to save lives by teaching how to stop uncontrolled bleeding in emergency situations. Crush injuries and the use of tourniquets will be included. Due to many situations, there may be a delay between the time of injury and the time a medical first responder is on the scene. Without intervention in these circumstances, preventable deaths will occur.

Instructor: Alan Faith Emergency Preparedness at Unity Point Health

Saturday Afternoon - 3 Hour

Aggressive Engine Company
Fires are won and lost by the ability of the first-due engine to place the line at the seat of the fire. Enabling the crew to stretch the line and make the push starts with an aggressive mindset and is supported by the setup of our apparatus. As our environment continues to reach flashover quicker, implementation of an efficient engine crew is imperative to get water on the fire. This course will review the basic engine company operations, from apparatus specs to the deployment of the hand lines and everything in between. This course will enforce the art of firemanship by understanding the apparatus, fire flows, and strategies and tactics for successful fireground operations. Class Limit 30.

Instructor: Lt. Ty Wheeler, Johnston - Grimes Metropolitan Fire Dept.

Responding to Utility Emergencies
When responding to emergencies we are often challenged by the presence of electricity. This 3 hour class offered both days will provide insight to the electrical distribution system and assist you in making safe decisions based on the hazards. It will include classroom skills and some lab setting hands on activities. You will not need any PPE however for this program.

Instructor: Iowa Association of Electric Cooperatives

TIMS Traffic Incident Management System
TIMS consists of a planned and coordinated multi-disciplinary process to detect, respond to, and clear traffic incidents so that traffic flow may be restored as safely and quickly as possible. Effective TIM reduces the duration and impacts of traffic incidents and improves the safety of motorists, crash victims and emergency responders. Class limit 30.

Instructors: Jeff Pratt, Sheriff Monona County and Kurt Meine, Iowa DOT

Volunteer Fire Chief Guidance
This program will provide a general overview of the responsibilities of an Iowa Fire Chief. It is designed for the Volunteer Fire Chief; either freshly elected to the position or seasoned with years of experience. This program presents a discussion of Iowa Law as it relates to the fire chief and offers an Administrative Annual Checklist that helps define areas of fire chief responsibility. Objectives include using the Iowa Code to define authority at a fire scene, investigation, and fire protection. Class limit 30.

Instructors: Duane Hendrickson - Secretary Treasurer Iowa Fire chiefs Assn.

Motivation in Training...Getting it back to your Department
This 3 hour class will look deep into your departments training program when dealing with the lack of motivation and the individuals that have a direct effect on it. We will explore why there is a lack of Motivation in your departments training and how we can overcome this. This class will provide you some information for you to take back and use at your department and give that extra boost of motivation where it may be needed. This class is broken down into two segments. The first is looking at why we don't train, and how that can lead to a lack of motivation. In addition, when we are training are we making the training stagnant, are we keeping the interest of everyone involved? Are the personnel at training there for the right or the wrong reasons? The second segment being, how to use our emotions to motivate us to train. What happens when there is a lack of training and we only give a small percentage of effort? We answer these questions and more during this class. Class limit 30.

Instructor: Scott Petersen is a FF/EMT Training Officer with the city of Fulton, Missouri Fire Dept.

Saturday - 6 Hour

Agriculture Grain Bin Rescue - $
This one-day (6-hour) course is designed to increase the success of grain bin rescues. Participants will gain knowledge of the proper procedures and equipment needed by working in a grain bin simulator. They will discuss patient assessment and care and use technical rescue equipment, such as ropes, harnesses, carabiners, mechanical-advantage systems, anchorage points, cofferdams, breathing apparatus, and tripods to actually pull people out of grain and through the roof of a bin, just like in a real rescue situation. They will also experience first-hand an actual engulfment and the pressures involved on their body. Full protective clothing (turnout gear - no SCBA) will be required for the hands-on portion of the class. Hardhat, gloves, eye protection, boots. This class will meet at WITCC, then move to the Sioux City Fire Training Center. Class limit 25.

Instructors: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)
Anhydrous Ammonia
This six-hour class will deal with a brief history of Anhydrous Ammonia and some common uses of NH3. Other topics useful for the First Responder include: physical properties, health hazards, first aid, and HAZMAT techniques for the first responder. Included is a walk through demonstration of a DOT-MC331 Tank Trailer (cut away) with an attached Rail Dome. No equipment required. Class limit 25.
Instructor: Amber Denman-Weathers, Health Safety & Emergency Response Supervisor CF Industries

The Art of Reading Buildings Before the Art of Reading Smoke
This 6 hr. class is designed to provide detailed training and exercise to improve the effectiveness of first-arriving officers and firefighters with a simple four-step method at residential and commercial buildings. The class will also provide you with an excellent opportunity to enhance your decision-making skills in determining the primary factors of strength, weakness, collapse hazards, new construction features, and evaluating the fire behavior effects on building structures. Wouldn't it be great, when you arrive on the scene of a structure fire, to be able to know how much fire you have, the layout of building, and where to draw your line-in-the-sand to contain the fire? Class limit 25.
Instructors: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)

School Bus Rescue - $
Do you think of young children in large yellow vehicles when you see the words “school bus?” Think again. This course will take a look at school buses today and various rescue methods to include advanced extrication techniques and patient care challenges. Upon completion, the student will be able to: identify early in the incident the resources involved due to multicasualties; demonstrate proper patient packaging and removal techniques; recognize the need for S.T.A.R.T Triage System and understand the special medical needs associated with bus accidents. Full protective clothing (turnout gear) required. No SCBA. Class limit 25.
Instructors: PRI and Fire Service Training Bureau Field Staff

Fire Investigation for First Responders
This course will examine the fundamentals of basic fire investigation for responding firefighters and fire officers. Participants will discuss the information and observations that need to be collected to establish the basis for a thorough fire investigation. The State Fire Marshal’s response policy and areas of coverage will also be provided. Basic terminology and burn pattern analysis will be provided and re-enforced through multiple case studies with special emphasis on the investigation of fatality fires.
Class limit 25.
Instructor: S/A John Ticer, State Fire Marshal's Office

First Five Minutes
This class will focus on the first five minutes on the fireground from the company officer’s perspective. Topics to be discussed will include size-up, the 360-degree survey, incorporation of modern fire research, and review and selection of appropriate attack strategies. Specific class objectives include: reviewing the importance of the company officer role and its impact on the outcome of the incident, demonstration of proper execution of the brief initial report, introduction and discussion on the importance of the 360-degree survey, and discussion of offensive, defensive, transitional, and investigative fire attack modes. Class limit 25.
Instructor: Lance Routson, MPA, EFO, Deputy Chief-Operations, Altoona Fire Dept.

Interior Fire Attack - $
Participants in this one-day (6-hour) class will gain information and practice the skills required to enter structures at ground level. The basic principles of firefighter safety, fire behavior, thermal layering, ventilation, stages of fire and fire streams will be reviewed in the classroom. Students will put their knowledge to use in the Fire Service Training Bureau's two-story Mobile Fire Training Trailer. This training unit will simulate conditions encountered in actual interior structure fires. During the evolutions the student will be able to practice SCBA usage, hose handling skills, communications, and fire attacks simulating ground level, basement fires, and above ground fires. Accountability and incident command principles will be used during the training evolutions. Prerequisite: Basic knowledge and experience in the areas of safety, fire behavior, ventilation, fire hose appliances, and fire streams. Full protective clothing (turnout gear) with SCBA required. Class limit 25.
Instructor: Iowa Fire Service Training Bureau Field Staff (FSTB) (PRI)

SLICE-RS
S.L.I.C.E. - R.S. stands for Size-Up, Location of the Fire, Isolate the Flow Path, Cool from a Safe Distance, Extinguish and then Rescue and Salvage. These terms and acronym developed to “operationalize” fire dynamic research concepts. Full protective clothing (turnout gear) with SCBA required. Class limit 25.
Instructor: Iowa Fire Service Training Bureau Field Staff (FSTB) (PRI)

Vehicle Rescue - Basic Applications - $
Auto accidents are the leading cause of accidental injury and death, and are some of the most common rescues that are responded to. This one-day (6-hour) course concentrates on efficient and effective use of extrication tools. Participants in this course will also learn the techniques needed to safely size-up and mitigate an emergency involving an automobile type vehicle. Topics include the proper procedures for vehicle stabilization, patient assessment, disentanglement, and removal. This course will give the participants hands-on experience with various types of rescue tools. Class limit 25. Turnout gear only, no SCBA needed. Must include proper eye protection.
Instructor: Professional Rescue Innovations (PRI)

What, Where, Why & How of Ventilation - $
This six hour class offered both days will provide a close look at the UL/ NIST Modern Fire Behavior/Dynamics studies. This class will provide data-driven tactics to create a safer environment for the fire service as well as the people we protect. Students will leave well-equipped to re-evaluate the longstanding procedures of the fire service. Full protective clothing (turnout gear) required. No SCBAs needed. Class limit 30.
Instructors: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)

Building Resiliency in the Fire Service
During this three hour class offered each day, members of the SCFR Peer Support Team will speak on the stressors that are inherent to the job. How this stress can manifest into a variety of issue, and what can be done to combat it. Removing the stigma and helping people identify the signs of Post Traumatic Stress.
Instructors: Lt. Wynn, MFF Hendricksen, Sioux City Fire Rescue
Stop the Bleed
This three hour class repeated both days, teaches civilians and first responders to save lives by teaching how to stop uncontrolled bleeding in emergency situations. Crush injuries and the use of tourniquets will be included. Due to many situations, there may be a delay between the time of injury and the time a medical first responder is on the scene. Without intervention in these circumstances, preventable deaths will occur. 
Instructor: Alan Faith Emergency Preparedness at Unity Point Health

Responding to Utility Emergencies
When responding to emergencies we are often challenged by the presence of electricity. This 3 hour class offered both days will provide insight to the electrical distribution system and assist you in making safe decisions based on the hazards. It will include classroom skills and some lab setting hands on activities. You will not need any PPE however for this program.
Instructor: Iowa Association of Electric Cooperatives

Volunteer Fire Chief Guidance
This program will provide a general overview of the responsibilities of an Iowa Fire Chief. It is designed for the Volunteer Fire Chief; either freshly elected to the position or seasoned with years of experience. This program presents a discussion of Iowa Law as it relates to the fire chief and offers an Administrative Annual Checklist that helps define areas of fire chief responsibility. Objectives include using the Iowa Code to define authority at a fire scene, investigation, and fire protection. Class limit 30.
Instructor: Duane Hendrickson - Secretary Treasurer Iowa Fire chiefs Assn.

Motivation in Training...Getting it Back to Your Department
This 3 hour class will look deep into your departments training program when dealing with the lack of motivation and the individuals that have a direct effect on it. We will explore why there is a lack of Motivation in your departments training and how we can overcome this. This class will provide you some information for you to take back and use at your department and give that extra boost of motivation where it may be needed. This class is broken down into two segments. The first is looking at why we don't train, and how that can lead to a lack of motivation. In addition, when we are training are we making the training stagnant, are we keeping the interest of everyone involved? Are the personnel at training there for the right or the wrong reasons? The second segment being, how to use our emotions to motivate us to train. What happens when there is a lack of training and we only give a small percentage of effort? We answer these questions and more during this class. Class limit 30.
Instructor: Scott Petersen is a FF/EMT Training Officer with the city of Fulton, Missouri Fire Dept.

Sunday Afternoon - 3 Hour

TIMS Traffic Incident Management System
TIMS consists of a planned and coordinated multi-disciplinary process to detect, respond to, and clear traffic incidents so that traffic flow may be restored as safely and quickly as possible. Effective TIM reduces the duration and impacts of traffic incidents and improves the safety of motorists, crash victims and emergency responders. Class limit 30.

Instructors: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)
Clandestine Meth and Explosive Labs
This course will examine firefighters, EMS, and law enforcement response to clandestine hazardous labs related to methamphetamine and homemade explosive labs. This course will examine the hazards related to each response and provide information concerning early detection of hazardous labs. Hazard recognition will be reinforced with multiple homemade explosive labs. This course will examine the hazards related to clandestine hazardous labs related to methamphetamine and

Instructor: Lance Routson, MPA, EFO, Deputy Chief-Operations, Altoona Fire Dept.

Vehicle Rescue - Basic Applications - $
Auto accidents are the leading cause of accidental injury and death, and are some of the most common rescues that are responded to. This one-day (6-hour) course concentrates on efficient and effective use of extrication tools. Participants in this course will also learn the techniques needed to safely size-up and mitigate an emergency involving an automobile type vehicle. Topics include the proper procedures for vehicle stabilization, patient assessment, disentanglement, and removal. This course will give the participants hands-on experience with various types of rescue tools.

Class limit 25. Turnout gear only, no SCBA needed. Must include proper eye protection.

Instructor: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)

What, Where, Why & How of Ventilation - $
This six hour class offered both days will provide a close look at the UL/NIST Modern Fire Behavior/Dynamics studies. This class will provide data-driven tactics to create a safer environment for the fire service as well as the people we protect. Students will leave well-equipped to re-evaluate the longstanding procedures of the fire service. Full protective clothing (turnout gear) required. No SCBA needed. Class limit 30.

Instructors: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)

Saturday & Sunday - 12 Hour

Essentials of Fire Fighting
A two-day (12-hour) class covering the basics of fire fighting. It is an excellent course to enable new firefighters to become of immediate help to the department. Topics include firefighter safety, fire behavior, ventilation, SCBA's, hose handling, ladders, forcible entry, and tactics. Class limit 100. Full protective clothing (turnout gear) and SCBA required.

Instructors: Captain Scott Meinecke, Sheldon Iowa Fire Department; Retired Chief Bob Welte, Danbury Iowa Fire Department

Structural Collapse
The course is designed to give first arriving emergency responders the tools to recognize structural collapse incidents, implement an ICS, safely stabilize and breach Type V buildings. The course will also cover heavy lifting for the first responder. Course will follow NFPA 1006 Chapter 9 Level I. NFPA 72 & 1951 will also be used in safety briefings. This class will begin at WITCC with lecture regarding the requirements of dealing with a structural collapse. Squad rotations will cover the remainder of time at the Sioux City Fire Training Center. Objectives include: load calculations, heavy lifting and shoring of load, breaching and breaking of concrete materials and shoring operations for interior stabilization of lightly damaged Type V prop. Students are required to bring the following items to class each day. Helmet, must be ANSI rates Z89.1-1997 Type 1; Steel toe safety boots, must be ANSI Z1 PT99 M1/75 C/75; Eye protection, must be ANSI Z-87.1; Work gloves (leather or extrication gloves); Standard work/duty clothing w/long sleeve shirts; Raingear suitable for search and rescue operations (Class exercises are conducted in rain or shine); Hearing protection, such as "ear foamous"; N95 style dust mask; Kneepads are optional. This class will meet at WITCC and then move to the Sioux City Fire Training Center. Class limit 20.

Instructor: Captain Tom DeBondt, Sioux city Fire & Rescue and Assistant Task Force Leader of IATF-1 USAR, and members of SCFR

Vehicle Rescue - Advanced - $
This 12-hour class is for firefighters, rescue squad members, and EMT's. This course will cover vehicle anatomy, scene assessment, hazard control, scene stabilization, patient assessment and care, disentanglement techniques and procedures, tool selection, and personal safety. Extrication techniques will be performed in a number of scenarios by the participants utilizing various hand, pneumatic and hydraulic tools. Turnout gear only, no SCBA needed. Must include proper eye protection.

Class limit 25.

Instructor: Professional Rescue Innovations (PRI) and Iowa Fire Service Training Bureau Field Staff (FSTB)

12:00 – 1:15 p.m. Lunch - Cafeteria – Kiser Building (Class release time will be staggered)
Fire School Format/Cost
The Regional Fire School consists of two days of training. The cost is $95 per person, regardless of the number of days attended. The $95 fee includes lunch.
Classes marked with a $ sign are funded by the Iowa Volunteer Firefighters Training Fund (VFTF).
Iowa Volunteers taking only funded classes are charged $80, for lunch and administrative fee. If the volunteer takes one funded and one non-funded class, then the fee is $95.
Participants registering for a VFTF course must use the VFTF course number. For example, The Interior Fire Attack - course would be (CSAF-1007-F01).
Please bring the appropriate gear for the classes in which you have registered. (See course descriptions).

Registration Information
REGISTRATION DEADLINE: MARCH 1, 2020
You may register by mail, fax, telephone, or online. To register by mail, complete the registration form and send it with the proper fees to the indicated address. Please feel free to duplicate the form for additional registrations. To register by fax, fax the completed registration form to 712-258-3295. To register by phone, call Western Iowa Tech Community College at 712-274-6449.
To register online, go to www.the-security-institute.org. On the left hand side, click on the TSI Training. The link will be on the Training Calendar in the Course Description and Attachments for the Northwest Iowa Fire School.
You will need to give the registration personnel your name, address, social security number and course number(s). After you have registered, send your check to: Business Office, Western Iowa Tech Community College, P.O. Box 5199, Sioux City, IA 51102-5199. On an enclosure, please list the names, social security numbers, and course numbers for the firefighters that were registered.
Since it is necessary to limit the number of participants in each course section, please indicate on the appropriate line an alternative choice for each day.

Billing and Refund Policy
Billing for all registered participants will be done regardless of attendance.
Registrations canceled before 5:00 p.m. on March 1, 2020 will receive a full refund. After that date, a $20 cancellation fee will be assessed. 712-274-6449.

Facial Hair Policy
Individuals with beards, sideburns or other hairstyles that interfere with the proper seal of a breathing apparatus face piece will not be allowed to participate in classes requiring SCBA use.

Code of Conduct
Your conduct while attending the fire school should be no different than it would be at home and in front of your families. Wherever you travel, that FD license plate, the blue light, the window decal, the Maltese cross on your jacket or tee shirt identifies you as a member of an honorable and proud profession. Your actions reflect not only upon you as an individual, but upon your fire department and the fire service as a whole. The public expects our actions to be above reproach—on and off the emergency scene. We hope that your actions while at the fire school will polish, not tarnish, the fire profession’s image.

Liability Waiver and Release
The Woodbury County Fire Association and Western Iowa Tech Community College will provide instruction in the courses the participant selects under the supervision of competent instructors. Some of the courses involve hands-on training that may subject participants to risk of injury. In consideration of being permitted to enroll in such courses, the participant acknowledges that he/she is aware of the risks associated with participation in such courses and is voluntarily agreeing to assume such risks. The Woodbury County Fire Association and Western Iowa Tech Community College, except as provided under Chapter 25-A of the Code of Iowa relating to tort claims, shall not be held liable for damages or injuries to students or persons participating in the school. Participants must be 18 or older to participate in potentially hazardous skills activities. SCBA Cylinders – Cylinders that are out of hydrostatic test date will NOT be filled.
For additional information, phone (712) 274-6449. A Fire School contact person will return your call.

Host Hotel
Stoney Creek Hotel, 300 3rd St, Sioux City, IA 51101. Ph: 712-277-9400.

Smoking or the use of tobacco products is not allowed on the WITCC campus.
